FLEX TI 400 S

A high-strength titanium frame ensures lasting durability. Sleek, minimalist design offers a premium aesthetic.

1. Compact Wheel Lock

The innovative scissor wheel lock provides secure and immediate stopping power. Its compact and sleek design allows for easy, effortless engagement and release. Engineered for ultimate convenience, the brake mechanism is simple and intuitive to use. Experience reliable safety and precise control with our user-friendly braking system.

2. Rear Axle Bracket Adjustment

The Rear Axle U-bracket functions perfectly. Achieve seat-to-floor heights in 2.54cm increments and adjust Center of Gravity over a 7.62cm range by simply flip over the U-bracket from front to rear side of the frame vertical tube. With a more rigid design than previous version, which offers the best performing ride in its class.

Carbon fiber components achieve an ultra-lightweight ride. Choose from multiple colors to express personal style.

3. Two Types of Footplate

We have two types of footplate available, swing away and fixed type. Height adjustable, simple and clear design, easy to transport and store.

4. Special And Universal

The signature frame is made of ultra-stiff Titanium tubing, which is the ideal combination of vibration dampening and rigidity. The adjustable features are intuitively designed for easy operation.

Specifications	FLEX TI400
Frame Materia	Titanium
Transport Weight	4.31kg*
Seat Width	36-52cm / 14"-20"
Seat Depth	36-52cm / 14"-20"
