Keyless start. Effortless go.
Smart display, clear view of your ride.

1. Angle-adjustable tiller mechanism

The angle-adjustable tiller can be effortlessly customized to suit riders of various heights, ensuring a natural and comfortable arm position. This personalized adjustability allows every user to find their optimal driving posture, significantly enhancing comfort on longer journeys. By achieving a perfect fit, the mechanism promotes better control and stability, elevating the overall safety and confidence of your ride. It's the key to a truly tailored driving experience, making the Journey scooter accessible and enjoyable for everyone.

2. Card keys enable easy startup

Experience keyless convenience with our advanced card key system, eliminating the need for bulky mechanical keys. Simply tap the elegant card to seamlessly activate your scooter, ensuring a smooth and effortless start every time. After Blue-tooth pairing, the phone can be used for inductive power on/off. This modern technology offers enhanced security and a touch of sophistication to your daily routine. Step into the future of mobility, where starting your journey is as easy as a single, effortless swipe.

3. Delta Tiller for Universal Comfort & Control

Experience effortless steering and superior hand positioning with our new adjustable Delta Tiller. Designed to reduce wrist strain and accommodate a wider range of users, providing a more natural and comfortable grip for longer journeys. The ergonomic design offers multiple grip points, enhancing stability and control in all environments.

4. Screen display control panel

Brand new upgraded display control panel with a touch-sensitive start switch, integrated horn button, light switch, acceleration and deceleration buttons, and a digital display for battery level and speed information.

Ultralight, leading in its class.
Lithium powered for lighter weight, longer range.

5. Compact storage space

Boasting a remarkably compact 70L folded size, the Journey is designed for ultimate portability. It stores effortlessly in the trunk of almost any car, ready to go wherever you do. This space-saving design eliminates storage hassles at home, in the office, or on the road. Your next adventure is always within easy reach, without sacrificing precious trunk space.

6. Four color car paint finish

Express your unique style with four vibrant color options, designed to match your personality. Choose a shade that reflects your mood and makes every journey a personal statement. More than just transport, it's an extension of your lifestyle, adding a splash of joy to your daily commute. Turn heads and brighten your day with a scooter that's as individual as you are.

7. Ergonomic air-mesh seat

Experience ultimate comfort with our ergonomic air-mesh seat, designed for lightweight support and enhanced breathability on every journey. Customize your ride with a 3-level height adjustment and an 8-position tilt mechanism to achieve your perfect seating posture. The detachable armrests offer added flexibility, effortlessly adapting to different body types and a variety of uses. This thoughtfully designed seat system ensures superior comfort and optimal control, whether you're commuting or exploring.

8. Integrated, CE-Certified LED Lighting System

Ride with confidence day or night. The newly integrated front LED light is CE-certified, meeting stringent European safety standards for visibility and illumination. Increases your visibility to others, ensuring a safer ride in low-light conditions or crowded areas. Durable, energy-efficient, and purpose-built for reliable performance.

Specifications

Weight Capacity	378 lbs (171.5 kg)
