TOUR TI400 ORIGINAL

Compact design for superior agility and urban mobility.
Sporty styling enhances performance and modern appeal.

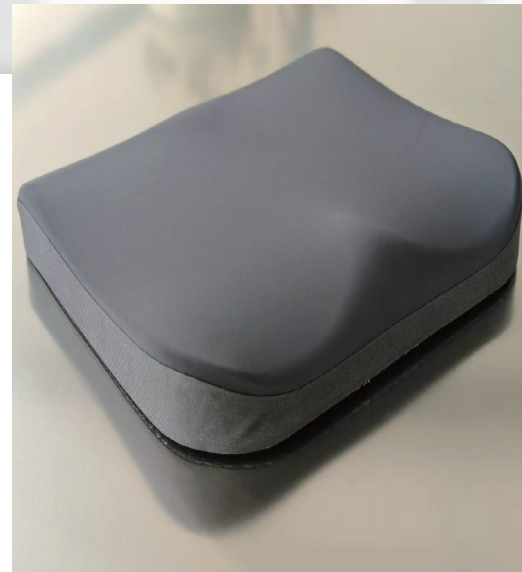

1. Two kinds of footplate options

Both are height-adjustable for personalized positioning. Opt for the angle-adjustable carbon fiber model or fixed loop style. Tailor your setup for optimal comfort and support.

2. Ergonomic seat system design

Ergonomically contoured to provide optimal lumbar and hip support.
Scientifically designed to distribute pressure evenly and reduce fatigue.
Enhances sitting comfort and stability during extended periods of use.
Customizable positioning promotes healthier posture and overall well-being.

Ergonomic support ensures comfort during active use.
Express your style with a personalized ride.

3. Excellent backrest system

Two types of backrests to cater user needs: the convenient snap-in backrest and the angle-adjustable, foldable backrest. The snap-in backrest offers quick installation and removal. For those seeking comfort, the adjustable backrest allows to find the perfect angle for relaxation. Choose the backrest that best suits your lifestyle and enjoy enhanced comfort and support on your journeys!

4. Unique built-in level gauge design

The built-in level on the front fork ensures effortless balance adjustment. Users can quickly achieve optimal stability for a safer riding experience. This intuitive design allows for real-time monitoring and easy calibration. Ride with confidence and enhanced safety through perfectly balanced positioning.

Specifications	TOUR TI400
Frame Materia	Titanium
