

VOLT

ELECTRIC POWER ASSISTANCE, ENJOY FREEDOM.

1. Lightweight design

Weighing only 10kg, it can be easily installed and disassembled at any time.

2. Superior climbing ability

Provide strong power for manual wheelchair without worrying about fatigue when encountering steep slopes, and easily climb over them.

3. Smooth and comfortable travel experience

Equipped with shock absorbers, effectively filtering out road bumps and enhancing the travel experience for wheelchair users.

4. Flexible turning performance

360 degree self-rotation drive provides more flexible handling making it easy to turn even in narrow spaces.

5. Long endurance detachable battery

Provide lasting power, meet users' long-term travel needs, and expand the scope of activities.

6. Simple remote control operation

The remote control interface is simple, with clear functions making it easy for users to operate safely.

7. Strong adaptability

Volt adapts to multiple models of manual wheelchairs, with one purchase and multiple enjoyment.

ELECTRIC POWER ASSISTANCE, ENJOY FREEDOM.

Continuously pushing the wheelchair will bring great pressure to your shoulders, and Volt provides strong power according to your needs, reducing repetitive pressure and allowing you to focus on more important things.

TOTAL WIDTH	42CM
TOTAL HEIGHT	37CM
WHEEL DIAMETER	21CM
